Work Experience

Solano County Park, Winters, Ca. - *Park Aide*

May 20, 2015- Sept 30, 2016

I was required to perform a lot of maintenance around the park such as cleaning bathrooms, picking up trash, landscaping around the park, work in the office and input reservations for campers, as well as run the boat rentals on the weekend. I also completed online training courses in Driving Safety, Fleet Program Safe Backing, Workplace Diversity, Bloodborne pathogen awareness, as well as Workplace Violence Prevention.

Pick-N-Pull Auto Dismantlers, Fairfield, Ca. - *Production*

May 1, 2017- July 5, 2017

Pick-N-Pull was a very fast past, physically demanding production setting. There were 8 different stations to the production yard and in my two months of working there I had fully learned 6 of the 8 stations. This was my first job that was big on safety being such an injury-prone job. I was required to wear the correct PPE at all stations (some requiring more than others.)

Milgard Tempering, Dixon, Ca. - *Production*

August 5, 2018-March 15, 2019

During my time at Milgard I worked in production which was primarily handling glass. I started off as a slotter which was just putting glass away on large slotted pallets called bungees. I did this for about a month until I moved up to the front and learned to measure pieces of glass and load it onto a conveyor to be sent into the furnace for tempering. I started to learn more and more about the production process and moved up the line in a very short amount of time I moved to seaming the glass before it was loaded and eventually after about 2 months I started learning the bridge which is where all of our glass was cut and finally became a bridge operator.

Davis Tire Pros, Davis, Ca. - *Lane Tech, Salesman.*

At Tire Pros I started out working out in the "lane" which was minor maintenance on vehicles such as oil changes, tire repair and replacement

Personal Strengths

Very Quick Learner Safety-Aware

Hard-Worker
Problem-solver

Reliable
Great team-player

Education

Chevron Regional Occupation Program, Richmond, Ca.

July 24, 2017- December 13, 2017

80 contracted days, 240 hour Plant Process Operator Course. (received certificate of completion)

Winters High School, Winters, Ca.

August 1, 2011- May 25, 2015

High school Diploma (Ag Leadership, Ag Mechanics, 3 years football team captain.)
